Subject: Site ID: A6K6 Scoping Meeting - San Mateo Creek Basin ground water data collection
Date: Monday, September 09, 2013 7:07:28 AM
Attachments: [SanMateoBasin Alluvium - Proposed Data Collection.pdf](#)

As you all know, EPA is planning to collect ground water data for the San Mateo Creek Basin project near Grants, NM, for Site Assessment and Enforcement purposes. The first step in this process is to have a scoping meeting to discuss our objectives and the goals for data collection and roles/responsibilities. Attending the meeting will be EPA, Weston (EPA's contractor), NMED, and USGS.

EPA and Weston will be meeting in the EPA Region 6 office in Dallas. USGS and NMED participation will be via teleconference or video conference (if I can set this up). It may be appropriate for NMED and USGS to meet at the USGS Albuquerque office.

We would like to have this scoping meeting next week. The best dates are Wednesday, Sept. 18, or Thursday, Sept. 19. There is the potential for this meeting to last most of the day. So we would likely start about 9 or 9:30 am (CST); 8:30 am (MST).

Please let me know your availability for those two days.

I have attached a map of the basin that EPA wants to start the meeting with.

Thanks,

Mark
